

IAEM - 2007 in Israel

The 2007 annual meeting of the Israeli Association for Emergency Medicine brought together emergency medicine clinicians and researchers from Israel and abroad in a highly successful academic, planning and social meeting.

The meeting opened with planning and operational meetings of the Israel Association for Emergency Medicine (IAEM), the official professional body for emergency medicine in Israel. Emergency medicine is a young specialty in Israel, and these are the formative years that will determine the character that the specialty will ultimately assume in its mature state

The following two day academic session was well presented and well received. Broad in scope, hands-on and didactic sessions covered areas including trauma, toxicology, health care management, and disaster planning. The research component is an effective forum for presentation of EM research in Israel and from abroad, and for sharing of knowledge and ideas.

The 2008 meeting will be held March 10-11, at the Hilton, Tel Aviv. Planning has begun well in advance, under the direction of Conference Leader Dr. Itai Shavit. Broad international attendance and academic and research content is anticipated.
